

## American PDC screw

Are Haydon Kerk lead screw and nut assemblies lubricated?

Haydon Kerk's lead screw and nut assemblies are self adjusting, maintenance free, TFE coated, and require no lubrication. They are optimal for high performance linear motion control. View our 100+ lead screw and nut styles.

Can a lead screw back drive?

Generally, back-driving will not occur if the screw lead is less than 1/3 the diameter of an uncoated lead screw or 1/4 the diameter of a coated lead screw. Application of lubricant to a lead screw can lower the coefficient of friction of the lead screw & nut system and cause the ability to back-drive.

Is Co-Op part of Pan American Screw?

Specializing in Fasteners for the Window and Door Industry, Co-Op is now a proud part of Pan American Screw. As a part of Pan American Screw, SureDrive stocks and distributes a wide variety of construction fasteners, woodworking fasteners, specialty tools and deck fastening systems.
