

Password

How do you set a password?

Open the Start Menu . It is in the bottom left-hand corner of the screen. Open the Settings App . Click Sign-in Options. Click Add. It is under the Password section. Enter your new password. This windows will allow you to set your password, and add a password hint.

How do you create a password hint?

Follow these steps: Open the Control Panel. Set the View by option to Large icons. Click on User Accounts . Once on your user account page, click on the Manage another account link at the bottom. Click on the user account whose password hint you want to create or change.

What is a password hint?

A password hint is a built-in feature of a computer operating system such as Windows. You may add a password hint when you set a password for your computer login. The password hint is optional to create a new account; you may add a password hint or not.
