

Screw air compressor Ili repair phone number

Does industrial air power rebuild rotary screw air compressors?

We rebuild your air end and return it to you, like new! Industrial Air Power is your premier resource for air-end rebuilds for all rotary screw air compressors from 10hp up to 1000hp. With thousands of remanufactured air ends completed since 2008, Industrial Air Power offers a reputable, reliable air end rebuilding service with unrivaled prices.

Can You rebuild an air compressor?

We can rebuild most air compressor brands we sell and service. Rebuilds include new gaskets, bearings, O-rings, repair of rotors, and seals, metalizing the shafts, inlet valve rebuild, and end plate repair if needed. We can also service the drive motor, "clean & bake" the windings, and install new seals and bearings on direct-drive units.

How do I Keep my rotary screw or reciprocating compressor running?

To keep your rotary screw or reciprocating compressor running at maximum efficiency, regular maintenance is key. Our preventative maintenance programs are tailored to your operation's specific needs, helping you prevent unexpected breakdowns and extend the lifespan of your equipment.

Can a Home Improvement Center repair an air compressor under warranty?

If you have a problem with your air compressor while it is under warranty, home improvement centers will not repair it. They will refer you to the manufacturer for technical support or to a local service center, like taking your car to the dealer for warranty work. Air Compressors Direct operates similarly.

What if my reciprocating compressor needs a full overhaul?

If your reciprocating compressor requires a full overhaul, we'll disassemble the unit on-site, ship the parts to our facility for repair, and reassemble the unit once all repairs are completed. We service all major brands, including Worthington, Joy, and Bellis & Morcom, ensuring your equipment runs at OEM standards.

What happens if a rotary screw compressor breaks down?

When a rotary screw compressor breaks down, it can disrupt production and cause costly delays. At ACS, our team of factory-trained technicians is here to help with emergency repairs and full overhauls for all major rotary screw compressor brands, including Ingersoll Rand, Quincy, Atlas Copco, Kaeser, Sullair, Sullivan-Palatek, and many more.
